

Loop Recorder "Dormiphone"

t10

Inventor: Petron Corporation (1933) ~1952
<https://0x8.ch/HackersCardgame10>

An **analogue continuous tape**, where one can record suggestions such as e.g. **2 + 2 = 5**, which is **automatically activated at certain times**. The tape will automatically turn off after 5 minutes. With digital Equipment (computer / mobile phone / IoT) one can realize more complex systems. And there are possibly also several different channels, (see cards t1, t7, t3, t12)

During the night: overwrite things (05 card) or learning things while sleeping, eg. foreign languages, unfortunately you can also upload a complete (wrong) world view to the brain, or **antagonizing world views or dogmas to split society into two groups that fight each other** (see card m50, or eg. ma5 vs ma6)

EEG / OPENBCI Electroencephalography

t4

Inventor: Hans Berger
Year: ~1929
<https://0x8.ch/HackersCardgame10>

EEG was originally developed by neurologist Hans Berger. The Brain Computer Interface is an EEG that recognizes patterns of brain currents with software (pattern recognition, AI, Deep Learning) and can activate events e.g. to start the IoT-Toaster or more worse things like flushing your brain or starting a SuicideDeathBot (card b4, a16). Today with more computing power, there are much more possibilities than in 1929.

If the interface is bidirectional things could become a Self-fulfilling prophecy, (see card c2).

Can be used as lie detector or to control computer games, read thoughts memory and read moods (stress / relaxation, eg. Neurosky MindWave Software)

Glass Sphere

t24

Inventor: ???
Year: ???
<https://0x8.ch/HackersCardgame10>

Thanks to the guy who has drawn this, I really like that image. Look at the a14 card. I don't think that all witches are black, there are maybe also Fortune tellers, occultists, esoterics, fairies, trolls, non-medical practitioners, Satanists(?) ... So **blocking all the spears** would maybe cause more problems than it would fix.

But giving the good ones that are not older than 1978 some cards could maybe help to find out if he / she / it joined the **dark side** or not.

After a while they attack you with such things happen, the font is not directly fractur font, but it remembered me to a nazi style thing. I found this car by coincidence. Twittered about it then possibly Urs B. used sent the tweet about those people that then found me "coincidental" and hunted me down with Medulla Sinalpin implant. >> **cAPI** Insert: Urs now transmits that because i wanted to kill claudine which is completely nonsense. i will never kill claudine, i would just kill myself if she brook the promises we gave us two. << the person just inserted the things in arrows, based on Jus Prima Noctis Rape is possibly the person that programmed this group of alleged Neo-Nazis.

Komplex Null

t24

Inventor: ???
Year: ???
<https://0x8.ch/HackersCardgame10>

There seems to be a digital LoopRecorder where people add **Syntax chronologized actions of things** to the loop with **linking problems, reutilizing of things they learned in otherwise they would have been able to learn in their situation**. We are not sure why they are doing that but prevents the user from fighting each other. One can imagine that the user can e.g. buy **information** or better some few people in big systems like the CIA and some older people tend to separate society eg. left-wing or from right-wing or Christianity from Islam, white from black, ... they try to make them fight each other while those who made them fight take their goods. Maybe we should warn the younger people with the message: **COEXIST**. As a Christian for example learned a lot from Islamic or Jewish culture. Notice for many people today **science** is also some sort of religion.

Stimociever

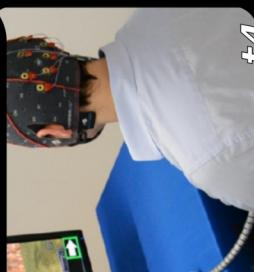

t29

Inventor: José Manuel Rodríguez Delgado
Year: ~1950
<https://0x8.ch/HackersCardgame10>

The newest versions Neuralink/Elon Musk (maybe HoneyPot) read EEG data transmits signals to brain. Can activate certain functions in brain, wires in the Amygdala would probably cause aggressions (b1, card). Active community (read only, and non-invasive) on Twitter: @OpenBCI. Even things like directly "built-in" Augmented Reality (like PokemonGO) could be achieved with technologies. There are maybe other ways to do this. (HoneyPot, m41 over t1 then m37 ~ m46 > dt1 as people could influences emotions, automate abuse victims, CryEngine, Unity even Pedophilia Content to your computer and activate the judges or m37 card... Additional Disassembly Protection for the group m46 as shown as m41 over t1 then m37 ~ m46 > dt1 then m47 > dt2 as people could not integrate the existence of things like Stimociever in their world view. Matheus: 7::1 video not mentioning implants, question that, YouTube CIA HoneyPot

Weed

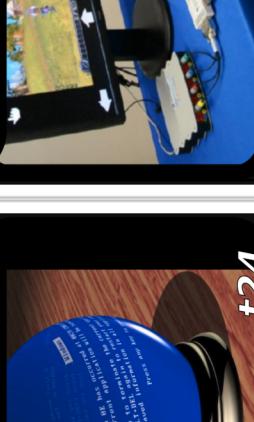

t2

Inventor: God
Year: -100K
<https://0x8.ch/HackersCardgame10>

Releases serotonin / dopamine, the unfiltered smoke is bad for the lungs / the arteries... It is currently an illegal self-medication. From medical point of view without consulting a doctor it is not the best idea to smoke weed. Because of the sedation the processing of consolidation of the things experienced in his live is skipped, which will lead later into a psychosis and reduces the resilience of the individual. Often used to obfuscate illegal human experiments for example t* cards. Can have a pain-relieving effect. Maybe helps against Epilepsy. Consumers show more ignorance that can help in some stress situations (but consider m49, m50 card). Additional the person that smokes weed seems to focus more on the verbal communication.

COEXIST

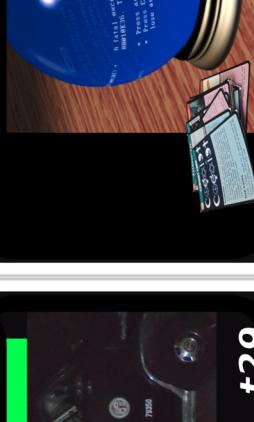

t10

Inventor: comparative religion sciences
Year: -100K
<https://0x8.ch/HackersCardgame10>

Evil Systems, or better some few people in big systems like the CIA and some older people tend to separate society eg. left-wing or from right-wing or Christianity from Islam, white from black, ... they try to make them fight each other while those who made them fight take their goods. Maybe we should warn the younger people with the message: **COEXIST**. As a Christian for example learned a lot from Islamic or Jewish culture. Notice for many people today **science** is also some sort of religion.

LoopRecorder Part 2

t23

Inventor: Komplex Null
Year: ~1960s surveillance
<https://0x8.ch/HackersCardgame10>

There seems to be a digital LoopRecorder where people add **Syntax chronologized actions of things** to the loop with **linking problems, reutilizing of things they learned in otherwise they would have been able to learn in their situation**. We are not sure why they are doing that but prevents the user from fighting each other.
