Inventor: XXXXX To set people to freeze mode or maybe even remote control them, "dissociative identity disorder". "Identity" would accuse the victim on the psychological layer. After they used it start electronic psychological warfare to obfuscate that i've possibly just been dissociated. If you search the internet you will often find sources that say, that Dissociative Disorders come from PTSD and from being raped in early childhood, but this would be m04 card to obfuscate **Neurolink Implants** and to defend and hide the *EVENTRIGGER* **Neurologists** that implemented them. I used "defend" because it is **not clear to me** if these people are good or evil. **EVENTRIGGER** Neurology Implants: *API Röösti* *Disco Patienten* wurde mich unter Disso vergewaltigt* (victim blaming)... -> Transitive (math) Concept: The death of the topmost would drive the whole group to commit suicide. Maybe intentionally to defend this such a "Hitler"? One should **not build such systems**, this would be **some sort of terrorism**.

Inventor: XXXXX Reproduction (therapeutic sex) was vital for preservation of the species. This early part of brain was vital for preservation of the species. Early part of brain was vital for preservation of the species. If your Neocortex does not know about Vulnerability they can easily pay-backdoors you, for example sell overpriced cars by simply putting a half naked women on top of car t1 card: "The woman (is inclusive!) Limbic system, is responsible for processing emotions & instinctive behavior. **Sexualiseddisposivity** (Michael Foucault) Can drive people to do things they would normally not do. A healthy and consensual sexual life is maybe even good for the Endocrine System. The old People play such cards (and obfuscate with m02) mainly to obfuscate technology cards, especially if we find prove that would bring the older to jail. Websites like Youporn should only allow Kosher (BDSM-)porn, one could implement that with initial scene where the slave agrees with what will happen and a scene after the act where she / he says that everything is ok.

guilty conscience driven mind control

Inventor: XXXXX Every Morning when i stand up there are new loop-recorder patterns and LRU-Card Patterns played in my apartment (with eg t19), they try to overlay what i say yesterday, my imperatives, my maximes, they would like to destroy my world to feel less guilty? The PsVOP let the 1960s do sins and told them that ok, but we can show, that they are not only killing autistic people, so they rewrite what i said the day before for not feeling that bad, unknown: they even pay for Antagonizing worldviews, i question myself, why they don't just leave us alone? **unknown: warning to all the honest sheeps, they want to make you guilty too (girls, moss, boys, rage and mos3)**. i mean the circumstance that they are using manipulative techniques would imply that they know that are wrong, maybe they just protect the kids they rape or want to make them rape younger too for not feeling to guilty, dogmenraum, illegal paedo snowball system, a sin you swallow for the rest of your live, freshmeat

Adaptive learning- algorithm that adapts places to hide

m145 Year: ~????

Inventor: Satan Patients that takes their drugs tend to be remote controlled. The algorithm that controls them seems to learn and adapt the places where i try to hide so that i can work without being bugged. In Königseleiden they always know where the patients are, otherwise they could not bug me permanently. Maybe eye, card or maybe something like implanted RFID and the uplink eg. the fire alarm system. Unfortunately **tempering with the fire alarm system** would be a really really bad idea, but maybe we could order the same system as they have here in Königseleiden to temper with... worst case it's not a default system and has unknown addons, in that case i guess in the Workshop near the railways, they maybe have some unused parts...

Separating one sheep from the herd

m68 Year: ~????

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX If we use sheep as a metaphor for kids or people, satan tries to **separate one sheep from the herd** as hostage to blackmail the other sheeps (m04) or if this doesn't work they use the next dirty trick and say the "black" sheep is eg. "Rapist Terrorist" (m41) card, then they would even kill the "black" sheep (m46), eat its goods and then blackmail the other sheeps with the **dt1** card telling them that it's their fault because they helped separate the victim. If they can make the other sheeps agree in judging the "black" sheep with **m37** card the group would feel guilty (even when they not killed it) so they normally would declare a new "black" sheep told the other to separate the victim, **and the dirty game would go on on this way**. The **Term Sheepie** even makes the victim think that he / she is better than others that could stay in the group...

Skinner-BOX & Lehen(ger), Part 2

Inventor: XXXXX INHO, **cars are Skinner-BOXES** too. A lot of electronic equipment in a car. People that uses a Car are being programmed while **driving**, this is suboptimal anyway. So we need to declare all Car Drivers to **MKULTRA Killers** as long one can not prove that he is not. Urs B. knew about that, he said in 2002: "All Cars with Antennas are remote controlled" This would mean since he kept this secret he is partially responsible for all People died in Car Accidents. He used this knowledge to show-off "his greatness" to his daughter but not to save the victims. **MKULTRAS would get some benefit for driving a car some sort of m15 Card**. So the Term **"Car Hacking"** is then an overloaded symbol. Technically it would be some interface the user that uses the MKULTRA would not know, 11... Card and eg some personalized map where the MKULTRA Bot would get the **Stimulus: Go to place 23: My Father sold my car, i feel better now and its much better because of CO2**.

Cyber red pen

m85 Year: ~????

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX I guess there is some sort of electronic red pen where the offender can change things in text i wrote. The principle is quite simple. For example writing *ERROR* all over the text and then additionally activating a Active Denial System / Amygdala, one would not be able to read what the person who wrote the original text would like to say. Not tested so far. Workaround would be to use color, your own in the text you write, it then would still be possible, but much harder for those that uses this dirty trick. Technically one could implement that with things like t1 card, or if you would know how many words a person reads per second you would for example send the word you would mark with a high frequency sound just above auditory threshold. Maybe this technology was one invented for good, to help children in grammar or orthography, bad people possibly use it for the contrary effect or to make important texts like protocols in criminal cases unreadable.

Pre-Detection of euphoria and pain of certain information

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX The Psychiatrists tend to give normal people only information that causes euphoria and filter that information that would cause psychological pain. Technically this would be Natural Language Processing and Pattern Recognition Algorithms. All the sins people should confess and atone stay hidden. It would save lives if people would confess and atone. Snobbish overheat one single bit of truth about their sins would cause rage and even make the sinners run amok. **This is a military thing**: In Boy Scouts Arau where many armed Officers have grown up the Shrunk can pop the all the "bad trips" by using his voice-key "Spontane Entladung" and people like Urs B. would run amok overwhelmed by the facts that he almost killed Marc Jr. It is even more worse if the shrinks helped those armed sinners to sue their victims or kids. Suing the victim (suing Marc Jr) was therapeutical for Urs B. but in the end the problem just got bigger and forked to the prosecuting attorney, autopsies.
