They seem to play this card only if one have hardly no money or spent last money to red cross for water in syria. One buys food with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t.l. they say that a suicide death bot was transfered to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only **workaround** i found was to **throw this food away**. I guess this is how they trigger poor people or homeless' people. The victim of this cyber-attack would then maybe attack the person that transferred that malware. (m50 Card). Often this sort of Malware spreads to your whole existence and to many of the scenes and objects you own. I heard they use same sort of malware eg. on **womans underpants**. We should transfer the malware back to the person who transferred it, but uneducated person would run amok.

Submissive Pet

Like a plush: to hug, pet and care for but more interactive.
Clinical use: as a coping strategy, e.g. you can buy a shy cat for a scared child, which then helps the child to analyze his fears without focussing directly on his own fears, that then might would lead to a cognitive dissonance & avoidance behavior instead of analyzing the things that caused the fear
As an all but unfortunately also by some to mistreat (Anonymous => Case Dusty; where I would expect that Kenny "learned" violence eg. from his father, so in worst case Kenny is a victim too, and if Anonymous would have beaten the shit out of him then someone maybe wants to play a dt1 card to the whole anonymous crew, unsure so far)

Location Based Psycho Terror / Psy-CyberWar

One can program events based on the coordinates of the victims. For example if i would be near **1** the annoying Janitor would be activated (t* cards) and even attack me. Or if i would be near **2** lot of cars pass by, **lot of stupid males that let the engines howl** would "coincidentally" appear. For this algorithm they must know your normal route and the average speed you have with your bicycle. It could also be used for good things, for example at **3** there would always be a lot of 20 years old that smile friendly at you. Anybody added me, just the red scenes. It is also dynamic, so the "design pattern" eg. number 1 for example could even follow me, making me paranoid. So it's more of a evil design pattern that hunts me and after a while one gets completely nuts.

Optically discredit people

Full of hope "to change the civilisation into a better state"
2019: Shown as criminal or Rapist, signs of psychological Warfare
In my case they also did such things, for example the "anti psychotics" also made me look ugly and made me behave strange, so that the people stopped or even feared to talk with me (m41) and they also told my friends that i would have raped a girl, killed another friend, so they definitely had to kick me out of the group of my equal aged friends that weakened me. But to be separated also helped me to stop drinking alcohol. I was drinking alcohol with friends but never alone. "Maybe" a bug in their plan. Beeing alone helped me to reflect about me, my past, the scenes that lead to the isolation, this cardgame helps to explain such situations.

Touring Complete Victim

m61

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX

One could create a touring complete avatar of the victim or the scapegoat and every time when the jury or his social system would of equal aged would listen to him and begin to believe that he is just the scapegoat, the victims / scapegoats touring complete **avatar would start to insult, intimidate the jury or social group**, so the group of equal aged would stop listen to him or even begin to **attack** him. This card seems to extends the m37 card -> dt1 card. Technically it would be samples of earlier scenes when the victim or scapegoat was tortured and he said things he maybe just repeated **applehammer attack of the mind, co2 card**. This would give quite a lot of work to create such an avatar, so it would be likely that the scapegoat is even a pedophilia victim. Maybe not all equal aged are driven by the parents generation, but we guess most of them.

Hipple-Brum

Its all the fault of the **the mothers fault** <->applebaum <-> or the fault of the kid >>**but definitely the mothers fault** <-> There are (Mothers/ Fathers) that force their [daughter(sons)] to eat from the forbidden tree. There are also Parents that don't feel guilty, so they would not have a reason to force their kids to eat from the forbidden tree. IMHO the NSA/CIA tried to use Jacob Applebaum as Jewish **scapegoat**. The Applebaum would be a symbol for all those people and sinners that killed an innocent equal aged friend (one out of 80) So the CIA has a reason **blackmail** and **dissociate** the left over 79 that "themselves" said **yes** to kill the "rapist terrorist", but in fact the Neuralink just transmitted this approval and stored the scene in NSACIA Data Retention. So we question the honesty of the universities where **Jake learned and taught**. However, people with names like Apiebaum, Apiebaum, Apiletree would be great opportunity for a generic multifunctional scapegoat satans.

Mirror Jury

m37

The TV-Series "Bull" just obfuscates this. Mirror jury (represented by a mirror ball) would mean to **motivate young people to judge an equal aged kid**. Worst thing that could happen is that equal aged kid runs smok or commit suicide. Since the whole group said **yes to judge that equal aged kid**, the whole group would feel guilty (**dt1 card**) and therefore need more (**illegal**) **drugs**. Situations can differ: on the computer, during a party, during séance... but if the (falsely accused) survives, there will be a **part 2** (see f-093, with a **15 card**). If only one single equal aged that says **No** to kill that equal aged the older card has one big problem: The **One** that did not vote to kill will ask lots of relevant questions that will maybe prove the innocence of the group of equal aged "judges". **While the same as human crime "sentence, ruled by parent generation, supports over the second agent**. People like the m37 card until dt1 was played. They believe that is once the person being sued but the "cool" judge that is morally better. Origins of this behavior maybe comes from the childhood and beeing part of a Group
