

SocioPsychology Rootkit for Mental Institutions

<https://0x8.ch/HackersCardgame10>

Inventor: **Satan** Year: ~????

Situation in Königsfelden. There are a "few" older patients that **tries to make the young patients more psychotic** to make it look more legitimate to give them Antipsychotics. There seems to be one Master Pedo-Patient that commands the other pedo-patients. They also influence the psychiatry nurses maliciously (making the nurses angry on the young patient, bl&t Card) that normally ends up that the young patient is being forced to take intelligence-reducing drugs.

Symbol Minded Spirit

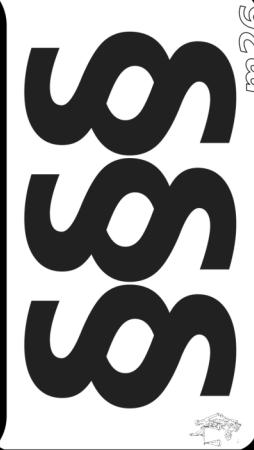

<https://0x8.ch/HackersCardgame10>

Inventor: **Unknown** Year: ~????

If a person draw symbols it's his psyche is maybe being **scanned for vulnerabilities** to later exploit them. The drawn on the lower left "i" created in **Mental Institution (obfuscated by Movie "The Manchurian Candidate")** Königsfelden and shows my whole life since i was child. One symbol for each scene i (or darestellen) remembers. If you compare those with symbols of Christchurch & breivik amok, one would maybe see that mine is more analytical, where i try to find things out, and the others are more of one symbol for PR / news. In any case if such things happen **there is possibly third person algorithm** that influences, in any cases remove the weapons, no matter if he/she would later commit suicide or runs amok. Different technology Cards, 0-day. **If you can rescue him/her "game" is not over, the person that scans will just take the next victim!**

Law article

<https://0x8.ch/HackersCardgame10>

Inventor: **xxxxx** Year: ~????

In the preamble of the Swiss Federal Constitution is written: In the name of God. We can therefore assume that for everything that went wrong. People produced an law article for, and over the years they also produced laws and regulations that benefits a single supplier or cartel for a specific application, (for example, Swiss fire protection regulations). And of course there are also good things in the law, for example having law that specifies how bridges should be built to prevent things like Ponte Morandi (English: Morandi Bridge). Unfortunately many people ignore the law that leads to many innocent deaths. When justice System is illegitimate or is abused by the powerful, citizens loose faith in the law that leads to more problems. <[Whistleblowers](#)

Project Paperclip ("innocent" Clippy)

<https://0x8.ch/HackersCardgame10>

Inventor: **xxxxx** Year: ~????

In videos you will hear often "project paperclip" but seldom a detailed explanation, "project Paperclip" definitely would be a honey pot or a database trigger, so be careful if you google it. Wikipedia talks about 2200 German Science Specialists and it talks about eg, about V2 Rockets (that is a strong image and maybe supposed to induces fear). We guess that those 2200 Scientists built some sort of Mainframe with a virtual model of the world in 3D or at least from the civilized world. There people can add eventtriggers (t4), or use Cyber-fluorescent-Pen (m84, m85) to manipulate the masses, to stick things to documents like people do with paperclips, easy to understand, no explanation needed, and the users that use it are then used to target for example whistleblowers that would like to expose that system. **Hacking Exposed**, First edition: "A network with a security vulnerability is insecure to those who know about the vulnerability". Spontaneous discharge

<https://0x8.ch/HackersCardgame10>

Inventor: **xxxxx** Year: ~????

spontaneous discharge seems to be a voice keyword to pop accuses from equal aged girls against the boys. They are done in office jobs (project paperclip, see a17 card). So the old generation keeps the problems active by not sending them to the accused boys, because the boys would try to change their behavior since they would be attracted by equal aged girls. And maybe many of the accusations are wrong, but by not sending them the accused boy can not tell his part of the story (~lauditor et altera pars). So both the young boys and the young girls are victims of the older generations, as already said it would be very likely that e. 1960s parents Cyber-Rape 1880s girls and just use the 1880s boys as scapegoats. The Keyword then activates all accusations against a boy that is whistler or whitehat hacker. While the 1960 say "I wash my hands in innocence", the keyword obfuscates as sexual integrity things, see image... isolating the accused from the group does not improve the situation....

Twin Towers

<https://0x8.ch/HackersCardgame10>

Inventor: **xxxxx** Year: ~????

I guess a lot people knew that the twin towers will fall. In my opinion very likely that the people from CIA knew if you look at m95 the "war on terror" would have obfuscated perfectly that the CIA began to undermine Switzerland since 1999 or even since 1968. This two **Rastal ARTWORK Collection** glasses I got from Werner Erisman @ ABB Flexible Automation AG, ZH Altstetten in the year 2000. When he gave them to me as a gift, he said something like: "This **Glasses will be precious in the near future**" With just a bit of imagination one could the two glasses that were in a nice blue cardboard as the twin-towers with the holes from the airplanes. When I asked Urs / Astrid Blum (there was a time when I trusted them) in 2002 what they think about my theory. They said "no, no of course nobody knew about that the twin-towers will fall". What they said seemed to me like a very cheap lie. As soon as one began to question the official version people began to discredit or even attack.

Just in case im Right with this card, it would be important to find all the young patients that got victim of such a "sondersetting" (german) and help them with exaggerated good people.
