

## Phylogenetic Tree

<https://0x8.ch/HackersCardgame10>

Inventor: ~XXXXX  
Year: ~?????

to find common ancestors. In my opinion people tend to focus to much on their genetic material, but knowing that we have lobsters as common ancestors and that they usually fight against each other to get the girl-lobster would be of use. mankind calls itself "intelligent" but follow these old German habits is maybe not that intelligent? Sorry A mad "scientist" maybe used swiss mental institutions and the #Verdingkinder for genetic engineering. If one of the victims would find out that this would be true it would maybe have a lot of trouble, they also would like to know what sort of genetical material works best with eg t1 card

## 5 Monkeys

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX  
Year: ~?????

An urban legend explains, that if you put monkeys into a room with bananas on top of a ladder and punish the whole group (**Behavioral Sciences, non-consequential**) if one of them wants to get a banana after 1000 repetitions the monkeys then would attack that monkey that tries to get a banana. You project this behavior to **Foucault's Disciplinary** (see German Article: Innenhalb Foucaults Theorie gesellschaftlicher Macht nimmt die Sexualität eine zentrale Position ein (<https://de.wikipedia.org/w/index.php?title=Sexualit%C3%A4t&oldid=30362100>)) and would cause pain to a group if one of them touches wiener (for example with Big-Data, b1, t1, t2 cards) they would attack the kid that touched his wiener. The Turtle comic (upper right corner) would imply, that this algorithm even crosses the line of generations. Crossing the line would cause the younger generation even to commit suicide since this socio-psychology-design-pattern then transmits pedophile parents that want rape the kids.

## Global Warfare

<https://0x8.ch/HackersCardgame10>

Inventor: Satan  
Year: ~?????

After the CIA most likely blew up the Twin Towers itself (maybe using t1 cards), George W. Bush declared accused countries media-effective to Terrorist-Countries (the Islamic areas are the oil-rich areas; source Prof. Dr. Danièle Ganser (@Unibasel)). In Western Media quite suggestive: "The War against Terror is only beginning" (**U76s2qCXtk**) The US Army has begun to attack this countries of mostly innocent Muslims, their Women and their children. To expose such war crimes is dangerous as we seen in the case of Chelsea Manning, honor your call **Chelesa**. The weapon industry unfortunately has no mercy killing innocents for more profit and as far as I know Bush's family has a lot money in this "industry"

## Pottery Crafts

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX  
Year: ~XXXXX

Guiltless been thrown out of the University, then they put Marcj in a Pottery course, which was sold as a "good" lesson to correct his (non-existent) arrogance, de facto it was psychological warfare to break-point (Marc Jr with pointless works: "go, do a bit of crafting you loose") = revictimizing of his childhood. 14 years before Snowdens Leaks Marc Snowden in June 2013 irrevocably, TNX Ed. Technically the Network could be secured, but the Network installed also malware and backdoors on the psyche of relevant People like politicians, Shrinks, Computer Scientists, Science People. To fix that too will cause tears, therefore never forget the a15 Card

## pituitary gland or hypophysis

<https://0x8.ch/HackersCardgame10>

Inventor: God  
Year: ~?????

In vertebrate anatomy, the pituitary gland, or hypophysis, is an endocrine gland about the size of a pea and weighing 0.5 grams (0.018 oz) in humans. It is a protrusion off the bottom of the hypothalamus at the base of the brain. Hormones secreted from the pituitary gland help to control growth, blood pressure, energy management, all functions of the sex organs, thyroid glands and metabolism as well as some aspects of pregnancy, childbirth, breastfeeding, water/salt concentration at the kidneys, temperature regulation and pain relief.

## AMYGDALA

<https://0x8.ch/HackersCardgame10>

Inventor: God  
Year: ~?????

The amygdala (from Greek ἀρνητικόν, is one of two almond-shaped groups of nuclei located deep and medially within the temporal lobes of the brain in complex vertebrates, including humans. Shown in research to perform a primary role in the **processing of memory**, decision-making, and **emotional reactions**, the amygdala are considered part of the limbic system, **NOT VERIFIED BY ME SO FAR!!!** Development / processing of anxiety, fear and anger, "fight or flight" - understanding or manipulating reaction, "rage", possibly having a medic for that would be great.

## NUCLEUS ACCUMBENS

<https://0x8.ch/HackersCardgame10>

Inventor: God  
Year: ~?????

The nucleus accumbens (NAC or NAcc), also known as the accumbens nucleus, or formerly as the nucleus accumbens septi (Latin for nucleus adjacent to the septum) is a region in the basal forebrain rostral to the preoptic area of the hypothalamus. The nucleus accumbens plays a lesser role in processing fear (a form of aversion), impulsivity, and the placebo effect. It is involved in the encoding of new motor programs as well. Not sure if this text from en Wikipedia is correct, having a medic for that would be great.

## EEG / FLASH QFIRE?

<https://0x8.ch/HackersCardgame10>

Inventor: Satan  
Year: ~1900?

I did not find any image from such a device. In Psychiatrie Königfelden (P4) there is an EEG installation. They measure your EEG with electrodes and in the same time it produces flashlights with a stroboscope. The **flashlight cause peaks on the EEG**? Ensure if that was "service" of the mental institution and they just tried to find out my perceptual threshold. The problem was that someone used this scene on the street or in my car and also flashed me, that revictimized the scene in the **Mental Institution and made me massive paranoid**. I dont knwo if psychological terror on the street was intentional or if this was just that eg the CIA stole the data and abused it against me. Question would be, what could one do with massive blade-server & IEE1388, eg. t1 card and a techno-party where many young people go to.
