

MRI / MRT

RISK SCORE: 10

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX Year: ~????

Originally an implant in the spinal cord (medulla spinalis) that could force an orgasm <<- (they talk explicitly about "sexual things") to make the people focus on that (m107 Card) and to obfuscate that the whole body can be remote controlled by such technology), maybe encanced with more than just that "wire" (US Army researches in this field). Output: the victim can be "used" as a robot, soldier / killer or sex slave with a 3D model of the victim in a 3D environment (like games) if all people would have such thing they could create a weapon out of such technology and unfortunately kill billions in a few seconds. Hopefully those who created this system considered that vulnerability. Mobile phone could act as Uplink to a mainframe (the US Army maybe uses the Cry-Engine with PhysX for the "Simulation")

t30

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX Year: ?????

To scan a human body, hopefully siemens does not have some sort of stuxnet virus here that filters implants and wires that were illegally implemented. Algorithm would be some interpolating algorithm that removes the implant and shows normal brain. But unsure about that so far...

Robot Teaching Mode

t22

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX Year: ~????

If your Hand suddenly begins with small movements on the screen. (Écriture automatique, return channel mouse) they have already hacked your spinal cord implant (medulla spinalis) and they are testing if they can take over my telemetry. In my particular case they beat my hands against my own head (there are movies where autists do such things and there are special helmets for that). After they sucessfully attacked you they revictimize the scene (t10 card). And even if they havent killed me, it would influence me. Maybe this is how they killed Tobias Moeser, m46. And for the equal friends of the victim this would have the effect of psychological warfare (m44) if they used dt1 the real offender say it is all your fault, if not they say it's because you ate eg a cookie or drunk wine or other stupid reasons and dt1...

(cyber-) Isolation Cell Padded Cell

t36

<https://0x8.ch/HackersCardgame10>

Inventor: ??? Year: ???

Mental institutions have Padded Cells or Isolation Cells where they put patients in. I was several times in such a Cell, the funny thing in Switzerland is, that the padded cell is not even padded. They say it's for people that would like to commit suicide, they even lock victims with straight jackets. It's about sensory deprivation, sensory deprivation is psychological violence or also some sort of behavioral "sciences". MHO it would be better to put the people who victimized the victim into jail.

They do the same thing with your contacts, there are several ways to isolate people from their social network and even from their family. I'm not quite sure, but i guess if they put you in a isolation Cell, the Network automatically isolates you for example also in your Social Network or the Internet. On the other hand empirical value can't be taught

Fill-Gun

t27

<https://0x8.ch/HackersCardgame10>

Inventor: XXXXX Year: ~????

Fil-Guns are sold as a Ring on a chain, for example in Tolkien's "Lord of the Rings". In fact would be a black box with socket and reset button to delete the keys on file. (Hopefully one has implemented an enhanced delete function) If you put fil-Gun into a Military-Radio (SE235, or t25 - t26) with frequency hopping, the Cryptological Keys are loaded and radio would join to Military Network. Frequency hopping would allow to transmit to golden wires (e4). My question would be, if the fil-Gun loads a radio, where are the fil-Gun loaded. Afak Urs B. told me once that the Zurich Insurane has two specially secured terminals. Male Lobsters (biol) tend to show off with objects of power to compensate their low self-esteem, in Biere an officer also showed off his Fill-Gun proud. I We guess that the Fill-Guns gives the owner access to all owned soldiers.

WiFi / Bluetooth or other beacon

t18

<https://0x8.ch/HackersCardgame10>

Inventor: Heinrich Hertz Year: ~1930

(E.g. The Apple iBeacon is a radio bank or a radio buoy with memory and a small processor, Can be used to place virtual GeoCaches, but unfortunately could also to transmit a Suicide Death Bot (a16) to a Cell Phone, Computer, Neuronexus Implant, WO200505579 to activate the victim to a suicide or amok run, worst case "Nuke function" like Lemmings™ in 1990s.

* children's toys, GeoCaching (=Sports)
* air traffic control (ADS-B)
* unfortunately also electronic / psychological Warfare
