My definition of a Mental Operating System would be a almost coherent dogma room for lazy people. See mos3 card. For example one could render down significant simpsons scenes on a Sun Grid Engine to 200x150 pixel and use this scenes on eg t1, t10, t12, t4 cards to influence the 1980s generation to do things the right way. For example when bart sells his soul and lisa helps bart to get his soul back. Since Matthew „Matt“ Abram Groening seems to be one of the good guys it would be hard for the mos3 card people to abuse the mos1 card. Hopefully those scenes are covered by normally broadcasting fees in switzerland, about anyway see card.

Important persons like politicians, scientists, parents... would maybe get an invitation to (Cyber-)rape a young girl or boy as soon as they become somehow relevant. All those of them that bleep in noobidoo fruit can then be blackmailed with persons that would know. "Maybe" NSAs / CIA datafatteners systems play a role there. **The CIA would maybe integrate only people with a criminal record like eg. pedophilia to keep them silent.** It is very likely that if one eaten this torbido but things like Suicide Death Bot would work better on the offender than also the victim. Even when the stream was only a simulation, things like m22, m44 would happen, and the offender would get dtl1 or m46, m02 card obfuscates technology cards t1, t10, t12, pedophilia is a trigger topic that **deactivates critical thinking because Pedophilia is a strong image, often only virtual, played to make people eg forget about things like Mainframe or in Switzerland, for example the Military Fiber Network where possibly the Active Denial Systems or the Country is controlled over (Backbone). It would be likely that the CIA promises always 88 virgins (seductive coercion), but if he would fulfill the false promise the CIA would lose influence. Der Weg war unsinnest, leider...**

Smoker

<https://0x8.ch/HackersCardgame>

If one smokes, it's possibly also a victim of such illegal human experiments. But it is also possible that one of the offenders smoke to obfuscate his role as culprit (a14 Card).

Behavioral "Sciences": They enable the pain implant in the frontal lobe, and if you smoked they disable it, so you smoke.

A photograph of a man in a dark military-style uniform with gold chevrons on the shoulders and a red beret, standing next to a woman in a light-colored bikini. They are both smiling at the camera. The background shows a building with a tiled roof and some greenery. To the left of the image is a green rounded rectangle containing the text "forced marriage Operating System". If a whitehat hacker discovers that the company he works in (for example in switzerland) is maybe owned by nsac/cia and would begin to tweet about that one would maybe ask, why the whistleblower was killed after tweeting that. So those people would attack him with different methods, eg, with declaring him Schizophrenic or with things like induced Occupational burnout. The chief maybe says stupid things like, "we only want to help marc" lets him in mental institution that he gets better, but as we know already, a mental institution makes it much much more worse.

To prevent that the remove whitehat hackers and whistleblowers or even kill them tell the people about this sort of nsa / cia infiltration and terrorism.
