**Role/Archetype**

**1990**

Guybrush Threepwood had the role of the hero in the Lucas Arts game "Monkey Island™". In classic tarot he would be "The Fool"-Card, actually too stupid to save the world, but has non-normal-distributed luck and his childlike behavior gives him high values in the mayer-briggs dimension "agreeableness" which would be perfect as a chessfigure of satan, admitting Guybrush is stupid not telling that he can use him.

But ignore him, focus on the technology cards that produces real three-headed-terrorist-monkey!

After dt1 card where i would have killed that i dont know and where i dont have a intentional motive since unknown (scapegoat) they now say "Booive drwan V's on Windows NT Computer." That prevented other users from going your path since this i planted booby traps against their sexual integrity. It's now legitimate to do this with you too and go against your sexual integrity". In fact this would be just a habit that was programmed. Technically it would be something like the 1960s movie about mindcontrol and orgasmotrons that gave incentives if i've drawn a V with the mouse, but no orgasm. Saying today that it is legitimate to do that with me too, because i did also would just prevent people to find the person who programmed this habit at ABB Flexible Automation AG in 1999 on a Windows NT computer, so possibly Windows / Hardware Builtin in and the boy that was not bugged just named as the person who planted the traps, but in fact he is just scapegoat...

If you would have something like Neuralink or US4877027 and Windows tells you **click here and an innocent person will die**, or mouse gestures **"if you draw a V with your mouse"** [dx/dt] [dy/dt] then a chinese person you not know will die. You maybe would not do this. But if someone adds, **"this should technically note be possible"** and is illegal, you would need to test that to check that nobody else goes into this trap. Maybe you really killed someone. Since you don't know this person (german: **kein Motiv**) and Windows was sold as kids-toy not as Weapon you are **maybe** just the scapegoat. Maybe people killed Humans on Windows so the "Collateral Murder" Video would revictimize 16Mio People for drawing this damn V on Windows. **m50** card, Unknown Genius; and those who have not really killed the victim but feel guilty too would help the real murderer to obfuscate, span, hide all evidence that could lead to the murderer or its network.

update: some of the hostages are institutional honeypots, for example if i found out about the fact that mental institutions are used by the cia (Mindcontrol=psychiatry=Psychiatry...) then we of course would try to free ierror's mother, but possibly the cia created this situation just in case that someone like me that was already in mental institutions would find out about this dirty game". So "possibly" there is already a big team that waits on people that try to free jacobs mother, so best way would be to help and support that people (eg. 92/mag8 people) that were already in the same mental institution help them and ask them for help and informations). It would be likely that not just in the case of ierror the mental institutions go after the whole family and also use m50 card in the family

consider cards: a14, a15, m124  
**DANGER:** If this hypothesis is correct be aware of a16 cards

The funny thing, in the end the big spiky blob kills Neo, making all people forget about the PsOP that was shown even as a good person. I dont believe that Sigmund Freud = PsyOP is a good person.... but this is not proven >yet<
