WHISTLEBLOWER

BLÖD JOB

<https://0x8.ch/HackersCardgame10>

Year: ???

Inventor: ???

The NSA or better the CIA attacks not only the whistleblowers, they also attack their girlfriends, their family (as we seen with Jacob Appelbaums mother) and their friends. The word **whistleBLOWER** has an eventtrigger on it, that pops the word **BLOWJOB**. And blames the whistleblower for watching "BLOWJOB Porn". I personally hate blow job porn and never click on that crap. They eg. put old people virtually in the bed of the girl of the whistleblower and says the people: "She must payback his sins" even if he had already paid back and 100000 views with only likes and no dislikes. Karma is a Bitch (ZM=0) So it's not the whistleblower that Cyber-Rapes or makes the people Cyber-Rape his girl. It's about control Baby. **Friends worst case would play m37 -> dt1 Card Combination**

Borg Hive

<https://0x8.ch/HackersCardgame10>

Year: xxxx
Inventor: My Hobby
Description: Running a massive distributed computing project that simulates trillions and trillions of macrocycles and keeps them all constantly fed and happy

So the question would be why did Star Trek discredit those cubes as collectively bad and why they are showing the Federation (that is a military system) as the good people, with weapons, uniforms, hierarchy that's the reason why we question the view of Eugene Wesley „Gene“ Roddenberry.

Assassin

<https://0x8.ch/HackersCardgame10>

Year: ???

Inventor: Christianist™ Terrorist. Run amok against 77 innocent young victims. As far as i could find out he was some sort of a "home child", "Street child" where one can only speculate what he was for an assassin with e.g. Technology Cards t*. His manifesto was "symbol minded", so i guess that it was some sort of symbol language they used. Maybe combined with legal or illegal drugs, maybe only in the beginning to set the base stimulus-response-habits. If this hypothesis is true, then the people that planned to kill the 77 victims is still free and plans maybe the next assassination. And the chances to find evidence on his devices or the devices of his neighbours is quite small because those people would assassinate innocent people as a profession. Maybe Epstein "customers" can be activated as terrorists or more likely that they would use younger people to do such things, eg that they would use their victim(s) m38 > c6 > m4 or at1

Bonnie and Clyde-Double Archetype

<https://0x8.ch/HackersCardgame10>

Year: 1910
Inventor: xxxx
Description: Frequent double archetype in US Movies: married couple, who live life in luxury financed with robbery and murder, sometimes including drug abuse. Often described as an "idyllic" partnership. These archetypes seem to be protected by some NSA/CIA malware because they also use them as starting chess figure / combination in an occupation area. Abusing the "family" is the basic unit of our society..." from the human rights shameless and the children of the couple suffer and have to pay the bill. Beeing protected by a system as big as the CIA means, that they will become ignorant and part of the problem. Worst case they have masked as judge and hangmen, worst worst case raping their kids after they judged them with a wrong accusation. There are cases where one of both plays m05, so that at least one of both would not get sentenced.

Scapegoat 2 (Gamer)

<https://0x8.ch/HackersCardgame10>

Year: ???

Inventor: xxxx
Description: Young people play games for fun, for having a meeting with friends over Teamspeak/Mumble (maybe mainly to discuss about Computer Science Stuff)
But there are also situations where the game or additional software tells them that if they win the game they would win things like women, money, degree... this wishes then maybe never become true
Later the people who added these features would tell that because of this headshot or nemesis pin with knife a real person died (dt1 card) so better focus on the Computer Science stuff.
