

ICD10 - F44.X Chess Clock [t37] <https://0x8.ch/HackersCardgame10>

Inventor: ??? **Year:** ???

IMHO there's sort of Cyber Mainframe Chess Clock that puts people into dissociation state makes them blind for certain things or people, even if would live in same apartment. Technically one could implement that with "Behavioral Sciences" also known as Torture. If you cause strong PAIN (see microdot below image) as soon as the one you love is in sight (eye1 card), maybe linked to an additional Stimulus (acoustic, visually, implants,...) things or people might be invisible <insert>for the person that should not have read the PAIN diskmag</insert>. **Worst case:** "I used" to rape young boys & girls; **best case:** helps to GUARD the world, since we don't know expect the worst. I don't have prove yet, but there was a two seconde scene i can remember in mental institution, where she stood in front of me and i was on my knee having some pain, as soon as i have prove or hacked it with the microdot i will maybe create a card in hackers card game, **unseen if hack would be blue or red team**

Needle Array [t28] <https://0x8.ch/HackersCardgame10>

Inventor: xxxxx **Year:** ????

Elon Musk says "we dont have enough bandwidth to the brain" but if you look at research like "micro needle array" then you would see, that one could create massive parallel interface to the brain. We guess the design of Elon Musk's interface is completely bad and that he even knows that. That what Elon Musk shows in his shows about the Neuralink would just be some sort of Neuronexus Product that he possibly did not even develop himself. It would be very likely that Elon has already such an implant and is now producing a low-tec interface that would act as honey pot. We will send this card to elon with the hashtag #Neuralink but we dont think that he will answer, maybe even filtered or he is being blackmailed by eg. the CIA....

hiding data and evidence [t34] <https://0x8.ch/HackersCardgame10>

Inventor: xxxxx **Year:** -????

As a younger person one has almost no possibility to store evidence in a way the older criminals can not find or delete. Especially if you would have an eye1 card they would know where you hide things. But if you have for example a big library you could take an SD-Card (i dont trust SD-Cards) or an USB Stick and take of the housing, then you can put that in a book from a library. If you close your eyes and select a random book you dont even know by your own then it is stored and even you would have to search a while until you have the stick back, but the older criminals would have to search too. If they know about that, they maybe start to search too, but then you can prove that they are actively searching for evidence, so you can call the police and make your case.

Chemitrode [t45] <https://0x8.ch/HackersCardgame10>

Inventor: José Manuel Rodriguez Delgado **Year:** 1950

Implants which release chemical substances / drugs that can be triggered via remote control. e.g. Adrenaline metabolism-promoting substances aggression, in the case of melatonin metabolism sleepiness. Influences victim's attention, but can also trigger the victim a suicide or to run amok. Medication but unfortunately also to activate a person as an #MKULTRA Killer ("cyberWAR") or kill the victim remotely with toxic substances. Today there maybe exists chemitrodes on molecular size. **WARNING, it is very likely to loose access codes of chemitrodes, and then the person that injected the chemitrode would be responsible for the death of the victim that died just because of a SIGNT security problem**

PoliceCar (Stimulus-Reaction-Habit) [t16] <https://0x8.ch/HackersCardgame10>

Inventor: Romans **Year:** ????

Etymologically, the term police is derived from the Greek τόπος, polis "city". It referred to the entire public administration (today as "construction police" and "fire police") outside of Greece as the fashion word of the Romans. Maybe abused as Chessman of the authorities, and in many countries the police are the group of people who commit the most murders. See also "Americans 58 Times More Likely to Be Killed by Cops Than by Terrorists". Violence, riots, sometimes conflict rather escalating, often intimidating, biased often preserving only the power of the upper class, we should teach all cops **Inductive reasoning**. (can you find the intentionally placed bug in m55 card?)

CIA MAINFRAME [t35] <https://0x8.ch/HackersCardgame10>

Inventor: CIA **Year:** ????

... it installs all the nasty cards to the people in Switzerland "Central" "Intelligence" Agency First it would not be central but distributed, second it would maybe not be that intelligent. It seems that CIA begins to blow up his PsyOps after one found that PsyOp creates multiple Death Circles (see mos* cards) It would be likely, that the PsyOps have contacts to the CIA network. *CYBER Blitzkrieg* (we translate what the CIA would like to say: it are the >>>Nazis<<< um the Germans and no, no the cia does not actively obscures qfire, quantum inserts, TURBINE and TARNOIL) But we guess that there is some sort of batch jobs that owns systems globally, not only computers or mainframes, but also routers, handies or the Swiss INTAF.. Who writes the Interfaces? Kerberos? We need to find out what devices can access Stimocerve, Neuralink... Wrist case most enduser devices have some sort of SoPs devices that can access * cards. In this case case we need to find out what devices, second thing what we could do is preventing things like NROL-39 Kraken... third thing we can do is to teach people Psychology

DELETED SCENES [t13] <https://0x8.ch/HackersCardgame10>

Inventor: ??????? **Year:** ????

NeuroNexus Implants [t3] <https://0x8.ch/HackersCardgame10>

Inventor: José Manuel Rodriguez Delgado -1950

Originally developed by Delgado, possibly been enhanced "in secrecy" since 70 Years, placed directly in the brain, and with software like OpenBCI and maybe Deep Learnign algorithms possibly recognizes even detail thoughts. (see **Neuralink**, **Elon Musk**, **HoneyPot**) No matter how good the encryption would be, if wires are made out of metallic wires all such devices would be vulnerable to side-channel attacks [$I_c = \lambda / n$] if the wires are black and there is a transmitting device with enough power nearby. (unsure if t25 or t26 or both cards) I tweeted to Elon Musk asking what he is going to do about this vulnerability, but he did not answer so far. Maybe just HoneyPot for older technologies, and maybe Hashtags are filtered.
